

# Pastoral Care 14 Multi User License

## Pastoral Care License

Pastoral Care Ministries licenses the purchaser to use the Pastoral Care software on as many computers within your church as required by the purchaser.

On a network system, you can install as many copies of the software on your network as you require without the need to purchase additional licenses or copies of the software.

When using Pastoral Care Cloud within your church you can install the program legally on as many Cloud users that you require.

This license is available to the single church which purchased the program. A single church is defined as a body of believers worshiping in one place under the directorship of one team of Church Leaders.

The only exception to this rule is the case where a single minister works in a capacity across several congregations as often occurs in rural areas. In those circumstances, the minister can own the software and use it for each of his congregation.

The spirit of our multi user license is that each local church body purchases their own edition of Pastoral Care, and that a denomination cannot purchase One Edition to be used by all churches.

This license is supplied in accordance with our Conditions and Terms of Sale set out during the installation of the Pastoral Care software.

## What does this mean?

Most software vendors require you to purchase a copy of any software you use for each computer you use it on. If you purchase XYZ for windows, and you want to install it on 10 computers, you usually have to purchase 10 copies of XYZ for windows.

However, for Non Profit Organisations, Pastoral Care comes with a FREE multi user license. In simple terms this means that you are only required to purchase a single edition of Pastoral Care 14, no matter how many computers you desire to install it for your church. (See Commercial Interests Below)

By purchasing one copy of Pastoral Care 14 you have the right to install the program on as many computers as you require within your church. For example, you can install the program on the church office computer, the pastor's computer and even your elder's computers for no additional cost.

This also applies to a church, which runs a computer network. Only one copy needs to be purchased for the church to install the program on their network.

This Free multi user license is only available to non-profit organisations, like churches. For commercial profit organisation a license fee is payable, please contact the developers for further information, our address is in the help about window of Pastoral Care.

### **What this does NOT mean...**

You cannot install Pastoral Care on a computer system outside of the care and management of the church it was purchased for.

It is illegal to install Pastoral Care 14 on another churches computer system, or to give Pastoral Care 14 away to another church. This multi user license does not allow you to install this on either another churches computer, or on someone else's computer who is not associated with your church.

### **Commercial Interests**

If you are a commercial company, or a profit based organisation, for example a shop, you are not granted a free multiple users license. You must purchase a license from the developers for each and every copy you want to install on your computer system(s). Please Contact Cornerstone Electronics, PO Box 611 Gisborne 3437 Victoria Australia for more information if required.
